

SOS MEDITERRANEE IS A CIVIL EUROPEAN RESCUE ORGANIZATION FOUNDED IN 2015 BY CITIZENS DETERMINED TO ACT IN RESPONSE TO THE HUMAN TRAGEDY UNFOLDING REPEATEDLY IN THE MEDITERRANEAN. THE ASSOCIATION IS A NETWORK OF SISTER ORGANIZATIONS BASED IN FRANCE, GERMANY, ITALY AND SWITZERLAND.

This document synthesizes the **SOS MEDITERRANEE France** Annual Report, the full version of which is available online: www.sosmediterranee.fr/medias/rapport-activite-2020.pdf (in French only).

FIVE YEARS: KEEPING THE COURSE IN SPITE OF PITFALLS

Once again the year 2020 has witnessed many upheavals: the Covid-19 pandemic that compelled the interruption of rescue operations for three months and the implementation of strict health protocols, the end of the partnership with Médecins Sans Frontières/Doctors Without Borders, the internalization of the medical team as well as the blocking of the *Ocean Viking* for five months by the Italian authorities...

Yet thanks to the great solidarity chain of our supporters, which far from breaking in the face of these major difficulties, has grown stronger, we were able to rescue 903 people in distress during 13 rescue missions with our ship *Ocean Viking*.

Furthermore, in 2020 the association celebrated the fifth anniversary of its creation. Five years of citizen's struggle, five years of solidarity, five years of mobilization to save lives at sea.

The silence of the European states has become increasingly violent, violence of the indifference, violence of the

look that conveniently turns away. With the testimonials of people who fled from Libya and were rescued by our teams, we are faced with the terrible inhumanity that prevails there. European States act as if all possible obstacles were implemented to prevent NGOs from responding to distress calls and from testifying loud and clear of the situation.

Throughout the year 2020, 1,417 people, women, children and men, lost their lives in the Mediterranean, not to mention unseen shipwrecks. Every year, this macabre countdown is added to that of the previous years, thousands of missing faces on our doorstep.

Facing this situation and in spite of everything, the *Ocean Viking*, our ambulance vessel, is an arch of humanity. Thank you to all teams on land and at sea and to all people who support us. We will always be mobilized for a mission that unites us: save and protect lives and bear witness to this drama.
